

**I get smoke back into the home after the fire has gone out:**

1. Pressure problems in the house. A competing source of air is pulling air through the appliance since it's the easiest place in the house for make up air.
2. [https://www.csia.org/how\\_chimney\\_works.html](https://www.csia.org/how_chimney_works.html)
3. A draft inducer like a [draw collar](#) that keeps the flue warm at all times will help with this.
